

BOLDAssembly BOM Generator

Makes Assembly Item creation in NetSuite fast and simple!

Fulfill **custom orders** quickly and streamline production with an interface that allows quick generation of Assembly Items (BOM's)

How does it work?

A button on the Sales Order opens the interface that allows impromptu design of Assembly Items and SubAssemblies.

Why customers use BOM Generator

- Allows quick product design for custom orders
- Simplifies BOM creation even when the components are not in the system
- Streamlines production process and speeds up fulfillment
- Can be configured to convert CAD files to BOM records in NetSuite

Save Time

- Fewer clicks
- Creates component items and sub-assemblies on one screen
- Preconfigured accounting settings

Powerful grid import interface

- Flexible import tool
- Creates multi-level assembly items
- Smart item and list detection

Built for NetSuite

- Built entirely in NetSuite
- In line with native ERP processes
- Easy installation and configuration

Eliminate tedious tasks and automates Assembly Item creation process
 Speed up item creation times between 5-30 minutes
 Provide greater item control for Production Managers
